Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Oka et al (US 4,324,629).

Oka et al clearly anticipate the invention as claimed. Oka et al teach (see figures, claims and col. 9, lines 50-55) a substrate plating apparatus for plating a substrate including a plating unit including a plating chamber for containing a plating solution, a concentration analyzing device for determining the concentration of the metal ion and a plating additive (EDTA) and a plating solution preparing unit based on the concentration of the metal ion and plating additive.

Regarding the limitation that the plating chamber plates a semiconductor wafer, this limitation is related to the article worked upon by the apparatus. Such limitations have been held to not lend patentable weight to a claim. See MPEP 2115.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 3 and 6 of U.S. Patent No. 6,294,059. Although the conflicting claims are not identical, they are not patentably distinct from each other because each and every feature of the present claim appears in the above noted claims of the '059 patent.

5. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,929,722. Although the conflicting claims are not identical, they are not patentably distinct from each other because each and every feature of the present claim appears in the above noted claims of the '722 patent.
